LOG CLIMBER
Intended user age: 5-12
CSA Z614

Bugaboo Designs
Design. Build. Play.

This Log Climber uses natural logs and rope elements to create a challenging yet approachable piece of play equipment. It supports balance, coordination, and strength while offering multiple ways for children to move through and use the structure. The simple, organic layout fits naturally into outdoor learning environments and encourages both physical and imaginative play.

Product Information

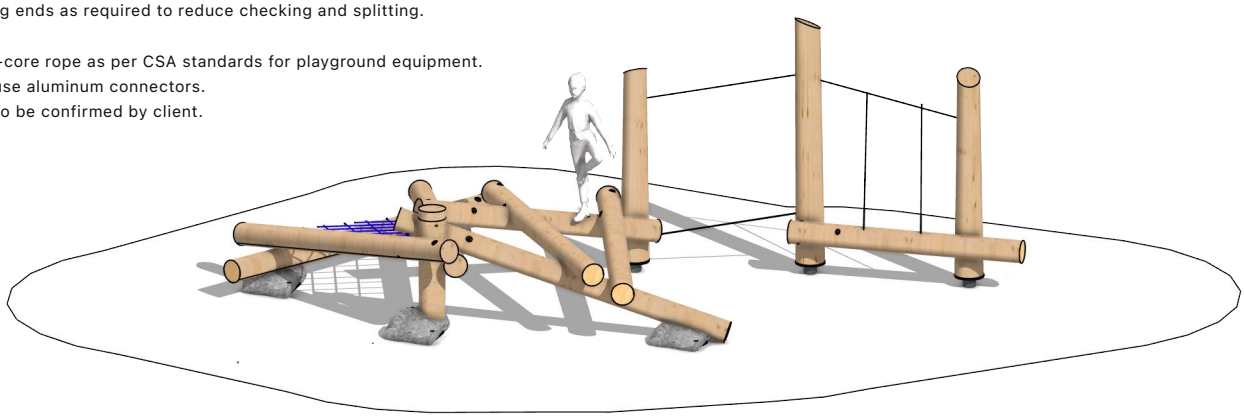
- All equipment, layout, fall zones, and protective surfacing shall comply with CAN/CSA-Z614 (latest edition).
- Log climber consisting of horizontal and inclined logs, rope connections, and a primary climbing net.

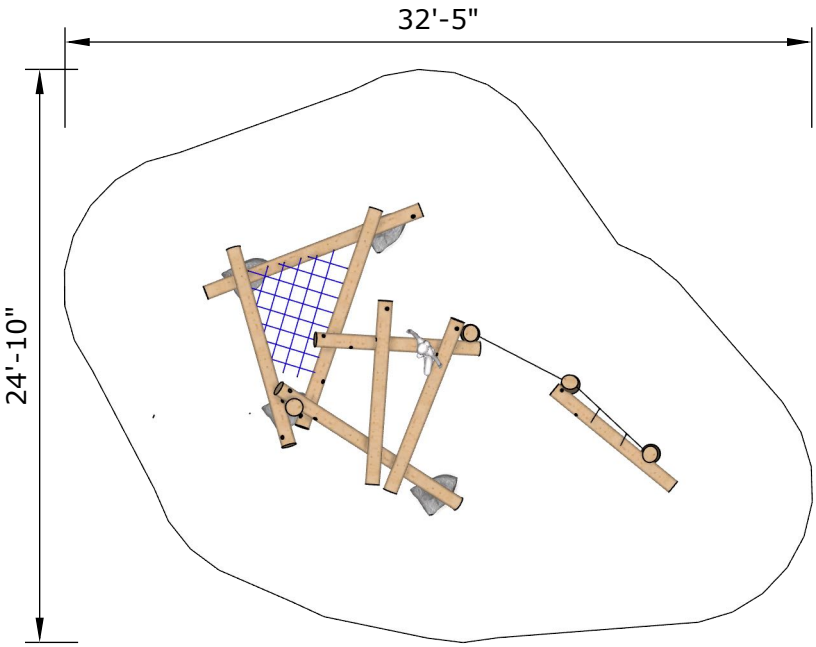
Materials:

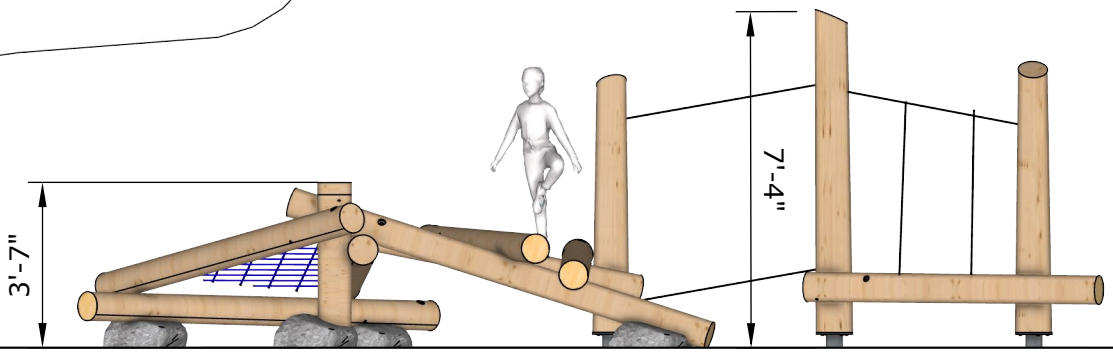
- Wood species: Yellow Cedar (Callitropsis nootkatensis).
- Log sourcing: Logs sourced from Canada.
- Logs to be sound and structurally suitable, free of rot or decay.
- Primary post and net support logs: 10 in (250 mm) min.
- All other structural and climbing logs: 8 in (200 mm) min.
- Screws installed at log ends as required to reduce checking and splitting.

Ropes & Nets:

- Nylon-covered, steel-core rope as per CSA standards for playground equipment.
- Net intersections to use aluminum connectors.
- Rope and net colors to be confirmed by client.







- **Maximum height:** 3.9 m
- **Maximum fall height:** 2.1 m
- **Required safety surfacing area:** 52 m²
